University kicks off 5th annual Global Understanding Project

On Sunday, April 2, the fifth annual Global Understanding Project (GUP) will kick off a week of discussions that incorporate student and faculty opinions regarding global issues affecting our society.

The lacrosse team captured their first NEC win of the year in an 18-5 rout of Long Island.

University's National Broadcasting Society captures grand prize

Members of Monmouth University’s National Broadcasting Society attended the National NBC Student Electronic Media Competition in Washington, D.C., on March 15 to 19, receiving 10 awards, including two Grand Prize categories and eight Honorable Mentions.

Middle States evaluates University

The Middle States Association Evaluation team visited Monmouth University for their participation in the accreditation process from March 20 to 23.

The news and entertainment sections are covered in the rest of the page.
Global Understanding Project

GUP continued from pg. 2

host 70 individual events which include: invited speakers, panel discussions, poster sessions, gal-

lery, films, performances, creative

awards, and classroom colloquia. Topics for these ses-
sions cover a wide variety of top-
ic, including international building, economic development, health, education, environmental chang- 

e and immigration.

According to a press release a number of these ses-
sions have been built around discussions that fac-

ulty members have had with their students. Faculty members can open their class-

rooms and welcome participation from other students and faculty to join in their discussions. For many other events, faculty presenters will travel to other campuses in the larger area to accommodate a larger audience.

“I have had the opportunity to work with faculty in all discipli-

nes and learn from them how global issues affect us in differ-

ent ways. By engaging in discus-

sions on these global issues, we can all be prepared to make a dif-

ference. With this knowledge and understanding, as students grow 

from young men and women into a global community,” said Dibicki.

Each year, the convention at-

tes to a theme. This year’s theme, due to the direct involvement from the Monmouth University com-

munity, has been “Hardball.”

“Over the years, the GUP mem-

bership has grown and we have increased and have gotten richer with 

enthusiastic participation from the Monmouth University com-

munity outside,” said Datta. “We are very pleased with the ways in which students and faculty members open their class-

rooms and welcome participation from others. We hope to see more events like this in the future.”

Dibicki noted that none of this would have been possible without the help of the GUP committee.

“I would especially like to thank the entire GUP commit-

tee who have worked tirelessly this year to make the convention a reality: Robyn Asato, Sheila Baldwin, Rose Chassay, Pat Crea-

son, Peter Deller, Jr., Christopher DeRoos, Archana Gane, Gk Lin 

Heish, Gk Mathew, Michael 

Patterson, Saliba Sarsan, Allison Tavoularides, Maureen & Vincent, Kathy Smith Wenning and Elea-

nor Swanson,” said Dibicki.

As reported in the article, the GUP will offer students an enhanced learning experience regarding topics that will play an essential role in the work field.

“With this knowledge and under-

standing, as students gradu-

ate from Monmouth and enter the work force they will be better pre-

pared to perform in the global com-

munity,” said Dibicki.

“All of us at Monmouth, both employ-

ees and students, should project Monmouth University as a place where leaders do look forward and are willing drive humanitarian ef-

orts to improve our world now and for future generations.”

National Broadcasting Society

NBS continued from pg. 1

Tom Hanley, NBS President and Monmouth graduate student, and Pat Perrotto, a recent Monmouth graduate, received the Documen-

tary Program (video) Grand Prize for their documentary on the documentary chronicling the ghosts of Monmouth’s campus.

The Ghost Awards were presented at a special ceremony held at Mar- collegiate event which students have not only em-

lished a student media student group, Network in Lakewood, N.J., a life-

time regional and national award.”

According to Hanley, the NBS submits only what they consider to be their most accomplished ma-

terial, noting, “It’s nice to say that you’re doing your work right.”

Those in attendance at the con-

vention were given a keynote speech by Chris Mathews from MSNBC’s Hardball.

“As reported in the article, a student group called the GUP con-

cluded their annual convention with a keynote speech by Chris Mathews from the MSNBC’s Hardball.”

SGA President’s Corner

Hello Monmouth University!

As the school year dwindles down and summer is in sight, many students are looking for jobs whether it is part time summer work or full time work for the rest of our lives before we retire (haha). We all become very anxious at this notion. Writing our resumes is one of the trickiest tasks in life and we have to find a way to impress everyone.

Well, for those younger students out there, keep in mind one way to build your resume is in college. Yes, it is the end of the semester, however, look into the opportunities to enhance your curriculum next year so you don’t waste any time and get involved right away.

Another way to enhance your college experience is to stick around Monmouth for the summer. There are grants available for summer courses as well as for on-campus housing, a new opportunity for students this year. Take a look to see what is available for this summer. It can help more students graduate on time or get ahead in their academic track. Many of us say that we came to Monmouth because the beach is here. Well, truthfully, we maybe get two weeks in September and two weeks in May of nice enough weather to enjoy the beach. Why not make an excuse to stick around West Long Branch for a portion of the summer? What more could you want?

On Tuesday the 30th I will be traveling down to the New Jersey Governor’s mansion in Princeton to discuss with him, as well as other student government presidents at other colleges, his new budget proposal to decrease funding to higher educational institutions. Next week, I will inform you of the outcome of this meeting and how it will affect Monmouth students.

SGA Elections will be taking place on April 10th thru the 12th on WebAdvisor. This gives all of you an opportunity to have a voice in who represents you on the student government and to the faculty and administration. If anyone missed the deadline for applications, keep your eyes open next Fall if there are any postings for open seats on the Senate. Good luck to all of you candidates!

Have a great week,
Allyson Goode
SGA President

Take Back the Night Preview

Women will reclaim their safety by walking across campus

LISA ADAMS CONTRIBUTING WRITER

Monmouth University will be having its first ever “Take Back the Night” on Thursday, March 30. “Take Back the Night” is an international rally and march against the fear that women encounter while walking the streets at night. The protest is a way in which women, as well as the entire campus community, can come together and take a stance against violence geared towards women.

Junior Heather Sary stated, “Take Back the Night is such a great event for our campus. Helping abused women, children and men is something everyone needs to help with.

“Even if we only get across to one person, that is one more life saved!”

The first “Take Back the Night” took place in England before making its way across the Atlantic to San Francisco in 1978. Since then, many college campuses nationwide have carried on the tradition.

Typically, the rallies and marches have been directed towards women. However, here at Monmouth University there will be two separate rallies, one for males and one for females, so that both groups feel comfortable to speak freely about their own personal experiences. Both rallies will begin in Wilson Hall at 7 p.m.

At the women’s rally, women will have the opportunity to speak openly about times in which they have not felt safe or were victims of sexual abuse or violence. Susan Roche, who plans on attending the event exclaimed, “I wish that taking a walk around campus really will bring more awareness to sexual assault. The truth is people need to change, our society needs to change.

The men’s rally will be similar a moving, powerful, and empowering event that you really need to be a part of if you under stand it. When you see the candle-lit procession moving across campus, it’s just a phenomenal sight. Let’s all unite and Take Back the Night!”

After the conclusion of the rallies, both groups will lead a candle-lit walk across campus. This march will be a way in which women, as well as the support of men, can reclaim their safety while walking across campus.

HEATHER KELLY
Assistant Director of Student Activities

“I’m excited that Take Back the Night is coming to Monmouth University. It is such a moving, powerful, and empowering event that you really need to be a part of it to understand it.”

MU Students attend “Waiting for Godot”

Over 400 Monmouth University students attended the Two River Theater’s production of Waiting for Godot.

FROM THE HONORS SCHOOL

Monmouth University and The Two River Theater Company in Red Bank are collaborating on a series of events this spring, which is running from March 14 to April 2. This event is one in a series that will enhance the cultural enrichment opportunities for Monmouth University students, and will lend support to Two River Theater at their new, architectural masterpiece in Red Bank, founded by Bob and Joan Rechnitz. The two organizations are working closely to co-sponsor events. Upcoming events include six more performances of the play in Red Bank between Sunday, March 20 and Sunday, April 3. Two of these performances will be held in Wilson Hall.

On April 1, at 1 p.m. at Two River Theater, Monmouth University students Alicia Ahlum, Erica Osterlo, Kelly Gahm, Angelika Baer, and Jessica Henig will perform a dance recital called Quod, directed by Matthew Arbour, as part of four short works. These events mark the beginning of a five-year collaboration between Monmouth University and Two River Thea.
Smith performs at Java City

CHAD ESPOSITO
STAFF WRITER

On March 20 in Java City located in the Rebecca Stafford Student Center, comedian James Smith presented his comedy sketch and had everyone laughing out of their seats. James Smith, the Australian comedian, has been seen on Comedy Central and many other venues throughout the world. He is known to come to performances seemingly unprepared but still put on a very comedic show. The show started with him making fun of Australia’s portrayal in our media and how badly it’s portrayed by people like the Crocodile Hunter who he jokes and says, “Is Australia’s George Bush.”

He also makes fun of the fact that he was performing in a coffee house where the smoothie machine drowned him out half of the time. They kept encouraging the employee behind the counter to keep drowning him out because it was funny and it gave him competition. There were also a lot of other things that didn’t escape his wrath like how the U.S. has broad clothing sizes and condom sizes. For example, a pair of underwear could fit anyone between a 30 and a 45-waist size. He also made fun of McDonald’s, Internet dating and said, “We went through different CDs of comedians and picked him out because we thought the campus would like him the most. He had a good demo and a great Australian accent.”

The reason she gives for choosing Smith to perform here from other comedians is because, “We went through different CDs of comedians and picked him out because we thought the campus would like him the most. He had a good demo and a great Australian accent.”

The Student Activities Board organized the event to come out and have a good time and some laughs.

Overall, it seemed like the audience had a great time. People from the audience were interacting with Smith’s great performance and everyone just kicked back and had a great time.

KERRI WALKER & NICOLE STEVENS
STAFF WRITERS

As part of Social Work Month, the Navegando Capoeira Association introduced the great Australian accent to Monmouth University’s annual March Madness event. Simon Carvalho, the founder of the Navegando Capoeira Club, spoke about how the capoeristas train and create a quick and effective move and the Capoeira as a part of Afro-Brazilian history.

Kelly Sanders, the founder and director of Monmouth’s Navegando Capoeira Club, started by saying the history of Capoeira is much more than just a performance, sport, or dance; it is a cultural activity and a part of Afro-Brazilian history. Sanders continued by saying that Capoeira is a symbol of the hope for freedom for the enslaved Brazilians, as they thrived to achieve a better life. The legacy of Capoeira spread such freedom, respecting each student’s capabilities not only in this particular activity but in life in general. Sanders described Capoeira as “an adaptive lifestyle,” which is well-rounded because it features aspects of fitness, history, music, culture, as well as learning a second language.

Mestre Carvalho, the president and founder of the Navegando Capoeira Association, spoke next. He elaborated on the history of Capoeira and its significance to the Brazilian slaves of the 16th century. Also, Mestre Carvalho’s speech demonstrated the significance of the art of Capoeira to social work work since, he said it is a great way for youths from different cultures and backgrounds.

Next, the group members (or capoeristas) performed several routines, first as individuals and then in pairs as they conducted a mock fight. While the individual performances showcased each member’s own skills, the fights gave the audience the opportunity to learn the traditions of the activity, such as the shaking of hands before each fight begins. The capoeristas demonstrated the basic principles of Capoeira, moving in fluid motions, adding kicks, hand-clapping, and various flips to create a unique performance.

It is a karate, Capoeira masters and students wear a belt around their waist. The color of the belt represents the colors of Brazil and what level the student has mastered. All of the group members have their own Capoeiran names to identify their accomplishments. For example, freshman Kaitlyn Wolf uses the name “Lobo” because it means wolf in Latin.

In the art of Capoeira, there is no blocking of kicks; rather the movements are to avoid being hit and create a quick and effective counterattack. Mestre Carvalho said that the routines were not coordinated, so the capoeristas had to avoid kicks and prepare counterattacks with only a moment’s notice.

As the capoeristas performed, the group’s other members played the background and played numerous instruments, including the berimbau (a one-string instrument), the atabaque (a drum), and the pandeiro (a framed drum). Mestre Carvalho later stated that the chants were used to send signals to the slaves as when to begin or join into the fight as or he calls it “the game.”

To master this art and gain such a honorable recognition takes several years of training. Mestre Carvalho has been practicing Capoeira for 33 years, while vice president, Kelly Sanders has been teaching Capoeira at Monmouth for six years, and his students have also put in a considerable amount of time and effort in an attempt to improve their capoeira skills.

The group also performed at the Monmouth’s annual fashion show and said, “We want to show local community members that important Capoeira is, there are alternatives to drugs and gangs that are major. Will Bhamonde, Jacob Bhamonde, Katelynn Born, Katleen Wolfe, Leilani Chin, along with Sanders’ wife, Jaime Sanders.

VERONICA

Like her neighbors, Veronica’s house is tucked away in an alleyway back from the street. She has a single kitchen/living room, a bathroom, and two bedrooms for her and her two children. The pain in my throat was still unbearable, but seeing the street scene took my mind off the swelling.

Veronica and the woman arose in the doorway, and Veronica sat by my side. “Baby, just relax,” she said, “and everything will be just fine.” Even though I am in a foreign environment, with a woman I had just met, in a desperate situation, her eyes held all the comfort in the world.

At this time I noticed an aroma overtaking the room, it smelled as most ritualistic. As my eyes peered back I could see the woman lighting candles under bowls of oils, which were now smoking. My heart rate began to increase. The earth seemed to stand still as phrasings of unknown origin permeated the elderly woman’s mouth.

After about two or three minutes (which felt like an hour), the woman’s voice grew silent. I was lying on my stomach with my head cocked over my shoulder and Veronica sitting beside me holding my hand.

I could see the woman raise a needle and squeeze a small amount of fluid from it. I began to freak. She then inserted the needle in the lower part of my back and plunged the fluid into my body. My senses were rocked as it felt like a great weight bearing down on my body. Everything grew slow as the time of the world though my eyes turned a shade of blue. The feeling could only be compared to as a huff on a body-sized nitrous balloon. I was out of my mind as my eyes danced uncontrollably around my head. The shadow from the ceiling fan sluggishly tickled the wall and I could see the eyes of Veronica’s young children peering through the crack in the doorway.

By the time I came to my senses the elderly woman had vanished and it was just Veronica and I. I slowly stood to my feet and collected my belongings. I still did not fully understand what just happened, or what I was just given. My skin was pale, faces smiling. I can still see them. Veronica was by my side as she led me along with the Village children back out to the street. After about 15 minutes I found and cab and was on my way back to the hotel, emotionally and comfortably numb.

Room 449 Las Palmas Hotel, 6:15 p.m.

I stood up and walked over to the bedroom mirror, glared into it and opened my mouth to reveal a sight that almost stopped my heartbeat in its tracks.

March 12 Saint Philomena’s Parish Rectory: Livingston, NJ, US, 10:15 p.m.

I am seeing a priest...
I like to think of myself as your typical, warm-blooded, no-better-or-worse than average Jersey guy. I relish our local cuisine (just the other day I had “Jerrie,” a cheeseburger topped with a pork roll). I support the local arts (I listen to Bruce Springsteen and watch Kevin Smith movies), and I am an active member of my local community (I worked at Six Flags). However, out of all the local stereotypes, there is none I embrace more than that of a guy who can simply not get enough of the boardwalk. The smell of the sea air, the lights, the sounds, the people, the prizes, the food. What’s not to love? Only the fact that when the summer ends, you have to wait another several months before you can experience this wondrous maritime carnival again. Or so I thought.

I was recently given some information that I immediately kicked myself for not knowing sooner: the arcades on the boardwalk stay open all year long. This must be a special Shore secret only black-level Jerseyans are hip to. This valled for the kind of serious, hard-hitting investigation only a born-and-raised Shore boy could provide. The world must know the secret of the boardwalk.

And so, on the morning of Wednesday, February 15 I set off with not one, but two photographers, my friends David DiMaggio and Caitlin Walsh, in tow to document whatever may unfold. Either we would come home with solid proof that the arcades were open, or we would be debunking this suburban myth before any other innocent game-losers could be duped.

When we arrived at around noon in Point Pleasant Beach, the parking lot of Jenkinson’s arcade and aquarium was about 1/3 full. A good sign. You know, there have been rumors among people who claim to know such things that Jenks’, if not all of Point Pleasant, is mob-run. I, for one, have never believed or spread such seedy gossip. As I and my pair of photogs hit the boardwalk, I was immediately surprised. There were people. Sure, they were wrapped up in parkas, snow boots, and earmuffs, and had to be careful walking around the snowdrifts left by the boards from Saturday’s blizzard, but they were at the boardwalk in the middle of February; old people, young people, couples, families. All walks of people, except, thankfully, the sound of metal detectors. I began to get an inviting message from the sound of the surf rolling in my ears and the smell of the salt water filling my nostrils. But I could not be swayed from my task.

When asked how often they came to the boardwalk in the winter, Amanda, who was in her 30s, and Joe, who looked as if he was in his early 60s, were both from Point Pleasant Beach and they each had two shopping bags full of claw machine prizes in their hands. When asked how often they came to the boardwalk in the winter, they shrugged and said, “Pretty regularly.” When I went out on a limb and asked if they came as often as they did in the summer, Amanda said “No, no,” to which Joe added, “We come more than we come in the summer. It’s just not crowded now. It’s so much nicer.” This is the price some locals are willing to pay to avoid confrontation with the unyielding hordes of bennies.

As I took a final scan around the vacant arcade floor, I shuddered to know what he considered to be a “slow” time.

The Outlook
Did you know that HIV is the sixth leading cause of death for AIDS cases? The ages of 25 and 44? I\'m assuming that a majority of you had no idea. Neither did I until my visit to the Monmouth University's Health Center two weeks ago. Hopefully that will be the next step for you and your partner after reading this editorial.

Now before I start, I\'ve never been known as a preacher but I feel it is my responsibility as Editor-in-Chief of a newspaper that students across our campus to inform you of the importance behind getting yourself tested and to continue safe sex thereafter. Kind of feels like high school all over again, well don't stop reading now because the information I\'m providing you might be surprising. Think you couldn\'t be next? Think again! According to smart.org the number of AIDS cases has declined over the years, however, there has not been a comparable decline in the number of HIV cases among youth. It's estimated that at least half of all new HIV infections in the U.S. are in young people and the majority of young people are infected sexually. Perhaps now is the time to rethink that douche and get to the health center. Let me explain just how easy it can be.

A few weeks ago a good friend informed me about the free AIDS test offered by our institutional. Following that, they suggested that I get tested. Without hesitation I said, "Sure, why not?" In the past I had the test performed the test. I told her about how my friend was here, she picked up I told her, "We have to go and get tested for AIDS." Asking moment of silence because she revealed her unhappiness about this decision. She had envisioned a list of things to do. After a little convincing I managed to persuade her in tagging along. Simply put, told her, "I want my best friend to be there if I find out I do have AIDS" - a great way to find out if your best friend really is a "best."

On that lovely Wednesday afternoon after a bite to eat we made our way to the Health Center. To my surprise there were other students in the waiting room, people that I knew. Although a little strange, discomfort turned into relief when I saw other people in the room with smiles from ear to ear. After a short while, it was finally my turn to take my place in the room and get the small piece of plastic and my results are given back to you within 20 minutes. Before I left the room to await an answer that would change my life, I began talking to the young lady who administered the test. I told her about how I called all of my friends and to drag my best friend here, and although my friend was here, she and the rest of them felt no need to get tested. This lady was not surprised one bit. It was then that she told me a story about a young lady who had been tested at the clinic in you\'re missing out on.

The young girl had not had sex with anyone prior to her test, but just recently started having sex with her boyfriend. Please note: If you are in fact diagnosed with AIDS, the test will not reveal that you are positive until 3 months after you have contracted the disease. This young lady had the test prior to the 3 month period, it was then suggested that she come back after 3 months. After receiving negative results, she got noticed 3 months later to take the test. It was in fact positive after only having sex with one individual. Don\'t think it can happen to you? Think again. The good news is, you can get tested on campus and it\'s free.

For those of you who erase all that so called "junk mail" that comes through your Squirrelin account, you probably wouldn\'t think it can happen to you? Think again. AIDS is a serious issue affecting not just recent college students but students across our nation. According to safesex.com, 1 out of 16 college students has AIDS. Hypothetically speaking, that's approximately 2 per class. If you are one of those students, don't be like the rest of the crowd, don't ruin it for others not knowing that it is in fact positive after only having sex with one individual. Don\'t think it can happen to you? Think again. The good news is, you can get tested on campus and it\'s free.

As silly as all this sounds to you, AIDS is a serious issue affecting not just recent college students but students across our nation. According to safesex.com, 1 out of 16 college students has AIDS. Hypothetically speaking, that's approximately 2 per class. If you are one of those students, don't be like the rest of the crowd, don't ruin it for others not knowing that it is in fact positive after only having sex with one individual. Campus computer solutions:
Suggestions from a real MU lab assistant

JEWNA GAUDIO
CONTRIBUTING WRITER

I recently read the article “Campus Computer Troubles” in the Op/Ed section. The article complains about slow computers, bad lab assistants, and the negative impact it has on students. Instead of starting a revolt of keyboard and mouse wielding lab assistants, I decided to write a reaction.

I am a freshman at Monmouth University, which puts me in the company of a lot of other freshmen who are likely to complain about things, but which I consider myself smart enough to manage the labs, so I know everything that goes on there. There are a lot of commuter students who go to this school. Naturally, the first place they are going to notice is the Long Branch Concordance (LBC), because it was designated particularly for commuter students. There are not an infinite number of computer labs in these buildings, but there are ways for people to relax or study in between classes.

If those computer labs are taken, don't go into crisis mode just yet. I guess no one told you in your four years in high school that this uni-

I don't know what lab you are in right now, but...in HH500, there is an empty computer on either side of me, and there is a soft humming of a working printer behind me.

It's just like the utopia you have been searching for.

Alternate Computer Labs and Hours
Lab Howard Hall 500 (Basement of Howard Hall) Ney Hall 101a (Basement Entrance)

Long Branch Concordance and MU together

Almost from the inception of the Long Branch Concordance (LBC), founded in March, 2004, the Monmouth University Department of Social Work has been an integral part of the organization. Many Dept. of Social Work professors have offered guidance and resources to the LBC. Interns and volunteers from the MSW graduate and undergraduate programs have contributed literally thousands of hours of service to the communities surrounding Monmouth University through their work with the LBC. These students include assisting families, children and individuals with all kinds of needs, from academics, to the homeless, to finding a way to get a very sick child to a hospital in Philadelphia. Students also assis-

OSAMA BIN LADEN’S NIECE
WAFAH DUFUR BIN LADEN IS
TO STAR IN HER OWN TV SHOW
IN AMERICA as she works her
way into pop stardom.
Do you think she should have this fame?
How does this make you feel?

OSAMA BIN LADEN’s niece is to star in her own TV show. Reporters for The Outlook say that this follows her dream to make it in the music business. What a controversy the trend here actually; give活下去实 are being called for. arbe Arafat and the president of pa are the issue. Terrorists are too much money we can throw at her. This is absou absolutely ridiculou. Now, don’t get me wrong. I am not saying this because she is the niece of the biggest enemy to you. What I am saying is, that is exactly what I am saying. But don’t turn this out yet, there is more to it than that.

How many no-talent idiots can there be in our country making music? Apparently talent today means absolutely nothing, and you can make it on your name alone. Are you kidding me? This is what she says go, “breaking into the music industry.” I didn’t really mean the extent of it until we gave Wafah Dufur Bin Laden her show. We’ve seen it with Ashton Simpson riding the wave of success from her father. Paris Hilton and Nicole Richie getting richer and famous with their last names, and Kelly Osbourne singing songs. Is this what is going on? Are you kidding me? Just because your father is famous, does that mean you can do music and become famous as well? No, only then you can pull it off as well. Although in this country, it makes sense to those with real talent, I’m sorry to say, you are at a disadvantage to those of us who don’t have it.

“I understand that when people hear my last name, they have preconceived opinions of me, of an American and I love my country. I am proud of my country,” she says when announcing the deal to develop the TV show. She even dropped the last name Bin Laden from her name to Wafah Dufur. Are we to believe that just because she makes statements about her family, she is going to help in any way to stop the(IOPE/ED) United States because she hopes to disconnect herself from her uncle, who has disconnected himself from the American people. I am in no way calling her a terror- ist, but I am saying that she should not have a show here, she should not be treated as if she had the same existence as her uncle. For all we know she is sending every penny she makes from this show to her terrorist family. After all, according to Foxnews.com she did get herself a ticket to New York to visit her mother in the last weeks before 9/11. Again, not saying she had anything to do with it, but you can’t help but wonder where her millions of dollars to do what with the show will go. In recent days, a lot of people are standing up in support of her saying that she should be allowed to make a living if she so desires. We will never amount to anything in America if we don’t let these people have a chance in the world. There are millions of aspir- ing musicians in this country who are hoping that their name alone will get them a shot at music on the radio and not that which is wrong with this country. I have no doubt that this show will be a huge hit and she will prob- ably even get a record deal out of it. Some day I would love to see the opening credits. I do however, and had said “The Outlook.” I am in no way calling her a terrorist, or accusing her of working with Al Qaeda and the Taliban. What she pleases. A lot of people are standing up for her saying that she should be allowed to make a living if she so desires. Three years after the start of war in Iraq, the United States economy is booming, despite having record-priced oil. Most attribute this economic boom to the current war with Iraq; however, there are others who doubt that the war is actually causing the economy to grow. The war is creating a growing rift between the wealthy and the poor, costing too many lives and degrading the quality of life for the average American.

It is a common belief that war will always bolster the economy. This belief, while widely accepted, is not always true. The reasoning behind the war is based on the fact that World War II helped the US economy to flourish. In the current conflict, probably the most important thing it is doing is pushing back the terrorists. It is a common belief that war will always bolster the economy. This belief, while widely accepted, is not always true. The reasoning behind the war is based on the fact that World War II helped the US economy to flourish. In the current conflict, probably the most important thing it is doing is pushing back the terrorists.

Recently a boom in the economy coupled with no terrorist attacks on US soil since 9/11 leads many to ask; Is the Iraq War helping our economy?

A recent boom in the economy coupled with no terrorist attacks on US soil since 9/11 leads many to ask; Is the Iraq War helping our economy? The experts also say that people are investing more due to this sense of security and comfort in knowing that their investments will be safe. The war on terror seems to be a major factor in these feelings. Charles Payne, who is a commentator on the show, made the point that the stock market is not the same as the economy. He also said, “Some people are simply not going to feel comfortable even if the market does go up.”

Bottom line? The economy will not experience the same type of boom from Operation Iraqi Freedom that it did from other larger scale conflicts. Any...that does occur will likely be short lived.

There are two old sayings that “War is good for business” and “Peace is good for business.” Is it possible to reconcile these two opposite ideas? Can we relate these contradictory philosophies to our current economic situation, and who is responsible? And just where did I leave my keys? Ok, that last question has nothing to do with the topic, but I was on a roll.

With our multi-billion dollar war on terror, operating in two theaters, it is only natural to wonder what this is doing to our economy. Historians are still arguing what exactly got us out of the Great Depression, so these questions are not new. I believe that things like huge taxes and social programs that happened during the New Deal didn’t help the economy at all. What helped us out back then, and helps us now, is the mobilization for war and the free market economy making a come back due to loss restrictions and...the Bush tax cuts.

Back to the present; it seems that liberals are crying that our economy is horrible, and that the war in Iraq and even old George W. Bush are to blame. I don’t necessarily fault liberals for hav ing these erroneous complaints, since the media is only showing the bad news in Iraq and reporting misleading statistics about our new booming economy.

The unemployment rate today is a strong 4.8%, which is down from 5.3% during the Third quarter of ’05. Ironically, news reports today point to these numbers and say that people are being protected by the government from terrorists. They are more comfortable in spending their money.

The experts also say that people are investing more due to this sense of security and comfort in knowing that their investments will be safe. The war on terror seems to be a major factor in these feelings. Charles Payne, who is a commentator on the show, made the point that the stock market is not the same as the economy. He also said, “Some people are simply not going to feel comfortable even if the market does go up.”

Bottom line? The economy will not experience the same type of boom from Operation Iraqi Freedom that it did from other larger scale conflicts. Any...that does occur will likely be short lived.

Commuter students may register up to two vehicles for the 2006-2007 academic year at NO CHARGE!!!!!!

- Registration through WebAdvisor will begin in April, 2006 – watch for more information
- Vehicles must be registered by 9/1/06 to avoid a late fee
- All vehicles on campus MUST be registered with the University Police

ATTENTION COMMUTER STUDENTS!!!!!!!

Educators launch campaign to improve higher education’s image

Saying that higher education needs an image boost, education leaders kicked off a national effort Tuesday to explain why colleges and universities matter. The campaign will include efforts by nearly 400 colleges to reach out to local communities and policy makers and explain their contributions to society. They hope to convince the public that higher education remains essential to the country’s future, and that it should be a state and national funding priority as government support has lagged during the past few years.

“As an industry, we have not done anything like this before,” said Terry Hartle, senior vice president for the American Council of Education, the national higher education association behind the campaign. “Our goal is simply to increase public understanding of the broad role that higher education has played in the past and must continue to play in the future.”

The “Solutions for our Future” campaign will feature national newspaper and television ads, beginning Thursday during the NCAA college basketball tournament. While he couldn’t put a dollar amount on the entire campaign, Hartle said his association will spend $4.5 million during the next three years and the value of the donated media time and space will be in the millions.

Backers say the multi-year effort is aimed at showing how the nation’s colleges and universities provide practical benefits for everyone, not only current enrollees and graduates. According to the campaign, colleges are the source of new technology and medical improvements, the reason there are Internet search engines and trained emergency personnel to respond to medical crises. And they help revitalize communities, advance culture and the arts, and foster tolerance in society.

By highlighting those contributions, the project strives to convince people that they should view higher education as important a spending priority as health care, defense and K-12 education. However, even as employers increasingly require a college education, state spending on higher education has declined in recent years. Between 2001 and 2004, for example, state appropriations per student declined by 17 percent or about $1,000 per student, according to the American Council on Education.

Meanwhile, the maximum aid for low-income students under the federal Pell Grant has remained at $4,050 a year since 2002, not keeping pace with inflation or tuition increases.

The campaign notes that global competition is growing and that the country risks falling behind without increased financial support. Its print ads note that other countries have boosted their public investment in higher education. But the United States currently ranks ninth in the world for the percentage of high school graduates that go to college, education leaders said. There are currently 16 million students enrolled in the country’s 4,500 two and four-year colleges and universities.

“In a real sense, what this campaign is about is helping the American people understand that accessible, affordable, high-quality education is our key to our individual and national hopes and dreams,” said William Kirwan, chancellor of the University of Maryland system. The public will get that message Thursday during one of the year’s most popular sporting events, the NCAA basketball tournament, when the league will air the first of about 20 ads that will run during this spring’s basketball and baseball championships.

The NCAA will donate millions of dollars in advertising time to the spots, said NCAA president Myles Brand. The ads were created by GSD&M, an Austin, Texas-based company behind Southwest Airlines’ advertising campaign.

Using humor to make its point, one of the three public service announcements features an overnight mail delivery company that tries to entice a pigeon to “air mail” a package. A voiceover says:

“Less support for higher education means fewer innovations, like overnight delivery and the Google search engine. America’s colleges and universities, we teach people who solve the problems and change the world.”
"Anxiety Disorders"

It is that time of year again, papers are piling up, final exams are approaching, some of you are going home for the summer, and some of you might even be graduating. All of these stressors can lead to anxiety. Do you ever wonder how much anxiety you have versus when it can be destructive and limiting and considered an anxiety disorder?

When you think of an anxiety disorder, a vision of Jack Nicholson playing the obsessive-compulsive writer Melvin Udall in As Good As It Gets, hopping over the cracks in the sidewalk, may come to mind. Anxiety, however, comes in many forms.

Fear and anxiety are a normal part of life, even adaptive in many conditions. Anxiety can help us stay alert and keep away from dangerous situations. Most people experience feelings of anxiety before an important event such as a final exam, a class presentation, or a first date. Anxiety disorders, however, are illnesses that fill people’s lives with overwhelming anxiety and fear which are chronic, unrelenting, and can grow progressively worse. Tormented by symptoms such as panic attacks, obsessions, avoidance, flashbacks, nightmarish, or constant worrying, some people with anxiety disorders can become afraid to leave their home. As a result, their quality of life suffers as they become unproductive and withdrawn, leading to problems with work and relationships.

Anxiety disorders are the most common mental illness in America. It is estimated that more than 19 million Americans are affected by some form of anxiety every year. Highlighting the most common types of anxiety disorders are as follows:

- **Panic Disorder**- Repeated episodes of intense fear that strike of unknown cause. Physiological symptoms may include chest pain, heart palpitations, shortness of breath, dizziness, loss of control, and fear of dying.

- **Obsessive-Compulsive Disorder**- Repeated, unwanted thoughts, or compulsive behaviors that seem impossible to stop or control.

- **PtsD (Traumatic Stress Disorder)**- Persistent symptoms that occur after experiencing a traumatic event such as rape or other criminal assault, war, child abuse, car accidents, and natural disasters. Symptoms include intruding thoughts about the event, nightmares, flashbacks, numbness of emotions, feeling angry, irritable or distracted, hypervigilance and being easily startled.

- **Phobias**- Two major types of phobias are social phobia and specific phobia. People with social phobia have an overwhelming and disabling fear of scrutiny, embar-

MU hosts activities to center on healthier minds and bodies

On Wednesday, March 22, Monmouth University hosted a variety of activities concerning the importance of a healthy body image. The Counseling and Psychological Services at Monmouth funded and organized the events for Body Image Day which included movies, health screenings, and guest speakers on how eating disorders affect millions of people in the United States.

According to Franca Mancini, Director of Counseling and Psychological Services at Monmouth, “The goal of the day was to increase awareness around the phenomenon in our culture today, to understand how the media influences our perception and acceptance of ourselves, to celebrate wellness through health screenings and nutritional screenings, and to have qualified professionals speak to the topic as all of these concerns impact college students.”

The day began at around 9 AM, when an activity entitled “Share a Thought” took place in the lobby of the Student Center. This gave the Monmouth Community the opportunity to write a “positive affirmation” on a large drape; Mancini said that about 30 people signed it. Entries for various donated raffle prizes were also accepted throughout the day.

A variety of movies were shown throughout the day in Anacon Hall. Dying to Be Thin was the first to be played. It was presented in order to show the audience how media and advertising influence body image. Also, How You Look Is Not Who You Are: Teens Talk about Eating Disorders was played to show the horrible effects that eating disorders have on not only the victim, but also the people around him or her.

From 12 PM to 1:30 PM, the health screening took place. They were a good way for Monmouth to lookout for the well-being of its students. Along with the ordinary health screening, Health Services also offered screenings for eating disorders.

Finally, from 2 PM until 3:30, a program entitled “Weigh Out” took place, which about 15 students attended. It was a lecture presented by psychologist Marnie Fegan, Psy, D. and nutrition therapist, Donna Gallagher, MSRD about the importance of mental and physical health.

According to the lecture, a college student shared her experience with an eating disorder as well as her recovery.
Passion, Tears, and Intellect: The Outbreak of Hard Rockin’ Full Out Freak

DAN ROTH STAFF WRITER

Full Out Freak is the epitome of what every band should strive to be like. They are extremely hard working, have diverse personalities and song styles, work together in a cohesive unit with near perfect communication skills, and have a level of talent that bears an early resemblance to legends such as Metallica, U2, and Sublime.

This may be high praise for a band that does not yet have an official label, however, once you listen to their self-titled first album, check out their Web site, or meet them in person you will instantly be a believer.

Perhaps the most amazing thing about Full Out Freak is their savvy. While most local bands struggle to get their music out to the public, Full Out Freak members, Joey Aparicio, Tim Quick, Eric Berkowitz, and Justin Neighbour took a different approach. While still playing and working on their music they also struck a deal with a number of different web sites including Yahoo! Music LaunchCast radio, MusicChoice, live365.com etc. This made the bands music available to over 37 million household’s worldwide.

This started the train rolling. In 2005 Full Out Freak won contests remotely unique, but who cares when you hear Full Out Freak what it is. Full Out Freak continues to work on new music all the time. Recently I had the opportunity to attend one of their practice sessions in which they were working on some new songs for the follow up to their self titled first album. If what I heard was any indication, this new record could very well be the push the band needs to reach the level of stardom and prestige that they are destined to achieve.

With Full Out Freaks’ music already readily available to over 37 million homes, I would hesitate to call them “the next big thing” because in many ways they already are. However, for those who are not listening, I would greatly urge you to tune in. Full Out Freak is the real deal and have what it takes to be at the top of the music industry for decades to come.

When a group of guys are as passionate about making music as we are and all share the same short and long term goals, all the time, energy, blood, sweat, and tears don’t really feel like work,” Justin Neighbour Full Out Freak.

For more information on Full Out Freak you can visit their Web site at FullOutFreak.com or Full Out Freak, on myspace.com

Fresh Faces: The Subways

BILL STECH STAFF WRITER

Four snot-nosed British kids form a band. Heard this before? “The next Sex Pistols” have been coming out since 1978. But the Subways, and their February 14 release Young For Eternity is something different. It’s fresh in an old-schoolday way.

The average age in the Subways is 20 years old, which either makes you think of Silverchair when they first arrived or Lindsay Lohan. But don’t get excited about them because of their age or write them off in spite of it. The Subways show what some of us have known all along: the British either start or perfect every music trend.

As important as the business’ side of the music industry for decades to come is it “garage rock”? In a sense sounds like what garage rock should be. It’s not rock, it’s not alternative or hipster either start or perfect every music trend.

The song you may have heard by them would be “Rock and Roll Queen,” which is slowly getting recognized by modern rock radio. It sounds like Chris Robinson of the Black Crowes went back in time and started a pseudo-punk band when he was 20. It has a basic chorus that probably sounds good in a drunken sing-along (“Be my, be my, be my little rock ‘n’ roll queen”), but is more sophisticated than that. There’s a sense of urgency in singer Michael Faris’ voice, and that’s something that usually books music fans look for something new.

The likely-second-single is “Oh Yea,” because of its catchy chorus, and female backing vocals. If you like the Pixies or the Talking Heads, bassist Charlie Cooper might conjure up some fun memories.

The Subways will probably fall through the cracks on American soil, which is ok. Even Oasis can’t get noticed over here anymore. But keep looking to the UK for new music. That’s where the good stuff gets noticed.
San Diego band surprises fans with new album

As I Lay Dying’s latest album Shadows Are Security reveals more than what meets the ear.

The band came crashing into the music scene with more than just their awe-inspiring lyrics and metal blows. “Our mission as a band is to get people thinking,” says As I Lay Dying’s drummer Jordan Mancino. “It’s all about recognizing your weaknesses and strengths.”

A great deal of the band’s time since their formation in early 2001 has been spent on the road, perfecting their ear-splitting sound with every stop. “Headlining for the Taste of Chaos tour was a priceless experience, we have gained an amazing appreciation for just being on the road in general,” says Mancino. “But there’s a lot more to what we do!”

The band’s touring experience easily provided them with all of the ingredients needed to set their new album Shadows Are Security on fire.

“The album as a whole represents a lot. It’s about life experiences and relationships, and taking what we learn from them,” he says. “It’s really about learning things for ourselves, rather than only learning what we have been taught.”

The last song off of their album not only sums up the band’s philosophy but ends it with a kick. “Illusions” was originally recorded in 2002, we really wanted to give it a fresh sound,” Says Mancino. “But personally, I really enjoy playing the song ‘Empty Hearts’ just because it’s challenging to me.”

There is no doubt that the five members are bringing themselves as well as their metal tunes to an untouched level, and Mancino credits his personal success to multiple musical influences. “Everyone listens to so many different things; I grew up on Pantera and Megadeth.” He says. “I think we were mainly influenced by darker metal bands.”

He also explains that despite the mainstream pull of other bands making it big, they will always stick to their own path. “Maybe in the future metal will get bigger, and if it does then good, but even if it doesn’t we’re always going to do the music we are passionate about,” declares Mancino. “Our style has definitely changed a lot to some melodic and European type stuff, but no matter what our sound is always going to flow to metal.”

“We really appreciate everyone that supports us and everyone that’s been with us.”

As I Lay Dying (from left): Tim Lambesis (vocals), Phil Sgrosso (guitar), Nick Hipa (guitar), Jordan Mancino (drums) and Clint Norris (bass).

HOW TO MEET: the woman of your dreams

KRISTEN RENDA: STAFF WRITER

Brian Herzlinger is like every other guy in the world who has a crush on a girl he will never have. Ever since he was ten years old and saw Drew Barrymore in ET, he has been in love with her. Now, twenty years later, he is going to pursue his dream and try to get a date with her.

Brian grew up in New Jersey, and moved to Los Angeles nine years ago. He always kept his eye out for Drew, in hopes of meeting her, and even managed to get close to her at the premiere of her movie Charlie’s Angels. Unfortunately, when he had the chance to speak with her, he froze and couldn’t find his voice. It is now three years later and he is hoping to find her again, and this time overcome his fear and actually say hello. With the help of his two best friends, Brian believes that they must know someone through six degrees of separation that can connect them to Drew. They manage to get connected to John August, the writer of Charlie’s Angels, one of Drew’s first cousins, and even Corey Feldman. However, can these people set him up with Drew Barrymore herself?

My Date With Drew is an extremely funny documentary of Brian’s attempts to connect with Drew. He only has 30 days and $1100 that he won on a game show to meet her. Can he do it? You’ll just have to watch it and see.

The album starts with his hit single Help Me followed by two songs, My Confession and I Stand For You, which both have awesome music effects to them. “Do I Have To Cry For You”, “Heart Without A Home”, and “Who Needs the World”, are all beautiful ballads that show a softer side of Nick. Whereas “Blow Your Mind” and “I Just Wanna Take You Home”, are both rock songs about Nick wanting to get with a girl he meets at a club. Both of those songs have a great beat to them and are fun to dance and sing to.

With the exception of “Is It Saturday Yet?” all of the songs on the album are fabulous, and show a side of Nick that is not seen through the Backstreet Boys. I think that many people would enjoy this album, and should definitely go out and buy it. You will not be disappointed.

---

When speaking of business deals, my professor said that a good deal is one in which both sides hurt a little. He said that in a perfect world both sides win, but since the world is not perfect, it’s considered a successful deal if both sides hurt just a little bit. Is the same true of relationships? As we don’t live in a perfect world, is a good relationship one in which both partners hurt a little bit? How do you know how much hurt is too much hurt? Or which hurt is good and which is bad?

There are friendships where one person feels like they’re always giving in to what the other person wants, always being the accommodating one; but they do it because the other friend has been there for them for a very long time and is always there in a time of need. In cases of friendship, it will either last and survive because the two will talk, or the other friend will simply come round and things will even out.

There are relationships between lovers and they almost always include pain, especially at the beginning. In the early stages, you’re both getting to know each other, so you don’t know exactly what pushes the other one’s buttons or what their pet-peeve is. Eventually, a medium ground is reached; the two people know each other pretty well and don’t argue too much. But what if the arguing starts? Or one person just starts to hurt from something in the relationship that changes? A behavior or an attitude may be? If it’s a solid relationship you should be able to talk about things and hopefully try to work them out. How long do you try for? How much hurt do you take before you give up and throw in the towel?

Today’s Birthday (Mar. 29th)
You’re very energetic this year, and highly motivated. Your odds of success are very high, too, with an experienced companion. Don’t hold back, but do the homework and take safety precautions.

To get the advantage, check the day’s rating: 10 is the easiest day, 0 the most challenging.

Aries • (Mar. 21 - April 19) - Today is a 9
You’re itchy to begin, and well you should be. Your instincts are honed and keen. The door that rarely opens is open now. Don’t hesitate.

Taurus • (April 20 - May 20) - Today is a 5
You’re under more pressure in some ways. In others, the pressure is easing. You know what to do. All you have to do is to do it.

Gemini • (May 21 - June 21) - Today is a 8
You’re anxious to get going, but don’t dash off all by yourself. You don’t want to outrun your friends and protectors.

Cancer • (June 22 - July 22) - Today is a 5
A stern taskmaster needs you to accomplish big objectives. Don’t be hurt by a sharp tone of voice. Focus on solving the problem.

Leo • (July 23- Aug. 22) - Today is a 9
Do you have any money left after buying the basics? If so, go ahead and play with it. Your luck’s much better now.

Virgo • (Aug 23 - Sept. 22) - Today is a 5
A little is nice, but don’t give away the farm. Resources are more abundant than expected. Make the change that everybody can live with happily.

Libra • (Sept. 23 - Oct. 23) - Today is a 8
You’re absolutely brilliant at anything somebody else wins applause. Join in, don’t be jealous.

Scorpio • (Oct. 23 - Nov. 21) - Today is an 5
You’re entering another very busy two-day phase. Clear everything else off your schedule. Focus on work until Friday.

Sagittarius • (Nov. 22 - Dec. 21) Today is a 9
You’re entering another very busy two-day phase. Clear everything else off your schedule. Focus on work until Friday.

Capricorn • (Dec. 22 - Jan. 19) - Today is an 5
You’re entering another very busy two-day phase. Clear everything else off your schedule. Focus on work until Friday.

Aquarius • (Jan. 20 - Feb. 18) Today is a 8
Do as much as you can. Your odds of success are very high, but don’t hold back. Focus on work until Saturday.

Pisces • (Feb. 19 - Mar. 20) Today is an 5
You’re entering another very busy two-day phase. Clear everything else off your schedule. Focus on work until Friday.

I expect the review will show how far we have come in the past 10 years in our development of the University and what we need to do in the coming 10 years to be an even stronger student-centered, academically respected institution. I believe that the best of Monmouth is still to come.

Examples of subcommittees included “Mission, goals, objectives,” a committee on integrity, and a committee on general education.

“For mission, goals, objectives you want to know what is the mission and how does it relate to the goals and objectives of institutions and how is it evident to what we do on a regular basis,” said Sarsar.

He added that the committee on integrity, for example, focused on finding “how well we are protecting the university’s integrity.”

“What we do in one subcommittee impacts other subcommittees,” added Sarsar.

Dr. Julius Adekunle, associate professor of the history department as well as co-chair of the Middle States Steering Committee, said that each chapter was “interconnected.”

In order to complete their research Sarsar said that the subcommittees interviewed different people, accessed and read documents, and etc.

“We accessed whatever was necessary to answer the questions,” said Sarsar.

Adekunle added that the documents they reviewed were not just from the past 10 years, but beyond that.

“They want to see how Monmouth has grown over the years,” said Adekunle.

The Middle States Association created the questions that the subcommittees answered.

“We had to address those characteristics as given to us and we conducted what we referred to as a comprehensive self-study which looks at all of those characteristics,” said Sarsar.

The self-study was submitted six weeks before the Middle States Evaluation Team arrived to Monmouth University.

“This is not just an exercise. It is a way that Monmouth learns from its experience for the last 10 years and project our plans for the next 10 years,” said Sarsar.

“We have had wonderful collaboration on everyone’s part. This process was extremely inclusive,” said Sarsar.

Sarsar mentioned of various ways of how “inclusive” the process was. For example, three newsletters were sent out, two open hearings were held on the self-study, a draft of the self-study was distributed to the campus so people could comment, and student government was updated on the process. He added that 100 copies of the final version of the self-study were distributed to the campus community.

“This entire process is based on continuous assistance of Monmouth University. It is very important that everyone participates,” added Adekunle.

Dr. Thomas Pearson, the provost and head of Academic Affairs, was another person involved with the evaluation. He said that he read the self-study draft as well as “will be very heavily involved in implementing the suggestions and recommendations of the Middle States Review.”

Pearson said that he is happy with the results as well as the commitment from the university community during this process.

“The reaffirmation of our accreditation is an accomplishment of our entire University community, and I am especially grateful to my colleagues across the university for their contributions over the past decade,” he said.

Overall, Sarsar said that he is satisfied that this process is taking place and that he “looks forward to a positive result.”

Adekunle said, “It has been a great experience. Everybody on campus relies heavily on this exercise.”

Pearson said, “I expect the review will show how far we have come in the past 10 years in our development of the University and what we need to do in the coming 10 years to be an even stronger student-centered, academically respected institution. I believe that the best of Monmouth is still to come.”

Middle States

According to Rivera, there will be an exit interview “where we present the major findings, strengths, and concerns.”

“After the evaluation is complete, the first step will be that I will send in 10 days a draft of my report to the president to look for any mistakes that have been made,” said Rivera.

“Once all corrections will be made,” said Rivera, “I will prepare a final report which is a collection of chapters done by each of the team members. Each team member is assigned a number of topics and they are responsible to write a chapter of the report on their particular topic,” he added.

He said that the final report will then be sent to the Commission on Higher Education. The final report is then again sent to the university.

“Then the university can comment on it. They can agree with the recommendations or disagree, suggest changes...” explained Rivera.

Rivera said the commission will receive the final report and the commissioners will analyze them.

“The report is then again sent to the university,” said Rivera.

“Then the university can comment on it. They can agree with the recommendations or disagree, suggest changes...” explained Rivera.

Rivera added that the document was approved on a regular basis, “for mission, goals, objectives and etc.”

“Then the university can comment on it. They can agree with the recommendations or disagree, suggest changes...” explained Rivera.

Rivera said the commission will receive the final report and the commissioners will analyze them.

“Then in June when the commission meets as a whole they receive reports from each of the 14 section chairmen. The commissioners will then comment on the full commission about the action to be taken with the university,” said Rivera.

According to Dr. Saliba Sar- sar, the Associate Vice President for Academic Program Initia- tives and Co-Chair of the Middle States Steering Committee, the self-study took approximately two years to complete and about 200 people participated.

“First we had to design a self-study that was approved by Middle States which was the basic elements of questions we were asking each of the 14 characteristics of excellence,” said Sarsar.

Short

Men's hairstyles are about having the proper cut and maintenance for men. The style is nothing with a harsh slicked back do. This longer, textured haircut gives a soft effect instead of a harsh slicked back do.

Nicole Richie has one of the ideal cuts for the warm weather coming our way. Her sideswept bangs and subtle face frame give the short do some bounce and body.

This updo worn by Ashley Olsen is perfect for a casual or formal affair. The loose tendrils around her face give a soft effect instead of a harsh slicked back do.

Full Foils, $120
Partial Foils, $100
Mens Cut, $25

For Dry Hair

Wella Lifetex Conserve, $10.79

The Outlook March 29, 2006 22  

HAIR  
ANDREA TIBALDO  
FASHION EDITOR  

The temperature is rising, but the length of women's hair is shorten- ing. The bob is coming back into length of women's hair is shortened out the proper cut and maintainence for men. The style is nothing with- out the proper cut and maintainence of your hair though.

The light, loose waves in Faith Hill's hair are flirty. These curls are perfect for long hair and can be made with a 3/4 inch curling iron.

This style of Ryan Seacrest's is slightly messy and slightly shorter on the sides. This 'just out of bed' look is fun for the summer.

This look is good for guys with thinner hair that don't have the volume to pull off the long hair but still want a spunky cut.

Getting texture cut into your hair as Ryan Seacrest has made for a fun look also. Letting your hair grow a little longer on top and using some gel to make it messy and playful is what this look is all about.

Not all styles are for everyone so make sure your stylist gives you some feedback before taking off the inches. Take the shape of your face into consideration too. For instance, if you have an oblong face stay away from long hair because your face will appear longer; if you have a round face don't go for the bob.

Sunrise and Sparkle- I love Morgan! Roxrix- just u, me, and the spot light baby!
Scottish granddaughter, grandmom and Bob Danhardt go towards the Qait-bay Citadel/fortress on Mediterranean Sea.

STUDY ABROAD

Also booked a trip for another week-sites, souvenirs, water, shows, tips. It includes my entire trip to Egypt: Tubs, $1793 (Okay yes tons of money, but may ever be.

I think really makes this place the most things, but that would take forever and want they wanted more than willing to help you with getting. One downside is that if someone serves you in any way you are expected to tip them. It is just a part of their culture. I think the thing that I found most surprising about the Egyptian people as a whole was their comprehension of English. I met more people in Egypt that could communicate in English than in any other non-speaking English country in Europe. Not one person that I met, and that included on those streets, was incapable of having a conversation in English.

Egypt is really a place of so many wonders and I do not just mean in terms of the Pyramids or other structural marvels. I mean in the sense of what it is and what it offers. The way it seems so primitive, but up to a date, that is mostly desert but has millions of palm trees giving it an almost tropical essence, a place that is so foreign but welcomes you in as if it were home. This is Egypt, not just a place of things to see but also a place of things to experience. Words could never do a place like this justice. I am lucky to have had the opportunity to go, especially at my age, considering that most tourists are middle-aged or older. I encourage anyone if ever given the chance to go to take it because it is somewhere like nowhere else you’ve been and can only be truly understood by going. As always, any questions, comments, hate mail, large sums of money, etc. e-mail me at s0576051@monmouth.edu or Robyn Asaro at rasaro@monmouth.edu.

Next week’s destination: Prague!
Jenny Roberts has been a conversely, Junior forward Jenny Rob-
erts may not always show up on the stats sheet. But, as Monica
Morgan-Levy, head coach of the
Monmouth University field hockey
team puts it, “She’s somebody who
doesn’t always play a starring role but plays hard, plays well and
contributes on the field. She
comes in off the bench and she al-
ways provides a nice spark for us.
She’s put in a couple of key goals for us.”

It seems that Roberts was al-
most destined to play field hockey. She comes from Pocomoke, Mary-
ly small town known for its
highly competitive high school
field hockey team. Her sister also played field hockey, and despite being
five hours away, her parents go to all the games.

“She’s in her blood and you can see that when she plays. It’s that
attitude and all the other things she brings to the team,” says coach
Morgan-Levy.

When it came to choosing where
she would play college field hockey, Roberts wanted to make sure
that the school she did choose had a good communication’s program.

“After I learned about Monmouth,” she says, “and came to visit and saw the Plangere
Center and met with the team, I knew it was the perfect fit.”

Morgan-Levy agreed. “I just thought she would be a great fit and
because she wanted to be a communications major, it worked out
great.”

Three years later, Roberts is
still contributing to the team in a big way. In addition to field hockey, Roberts is involved with
Hawk TV. She is a communica-
tion major and hopes to continue
working in the field of television broadcasting.

This fall, Roberts will be en-
ing her final season here at Monmouth, and she will be great-
ly missed, not just by her coaches, but by her teammates as well.

“She’s a good friend to everybody.”

About Her: “It’s in her blood and you can see that when she plays. It’s that
attitude and all the other things she brings to the team,” says coach
Morgan-Levy.

When it came to choosing where

Track and Field begins title defense

ALEXANDER TRUNCLE
ASSISTANT SPORTS EDITOR

The Monmouth University men’s and women’s track teams opened its spring season on Sat-
urday with a slew of strong indi-
vidual performances. Thirty-two
teams from all over the East Coast came to the event, including 11 Division I teams.

In the hammer throw, the men
took three of first five spots. Skowronski took first place with a
throw of 180’6” more than 10 feet ahead of second. She has scored key goals during her career that has
tilted her team to victory. She made five starts last season before missing time due to an
injury. Jenny is also involved in
the campus television station, Hawk TV.

opened its spring season on Sat-
day with a slew of strong indi-
vidual performances. Thirty-two
teams from all over the East Coast came to the event, including 11 Division I teams.

In the hammer throw, the men
took three of first five spots. Skowronski took first place with a
throw of 180’6” more than 10 feet ahead of second. She has scored key goals during her career that has

tilted her team to victory. She made five starts last season before missing time due to an
injury. Jenny is also involved in
the campus television station, Hawk TV.

Hawks dominate LIU 18-5 to claim first Northeast Conference win of season

EDDY OCCHIPINTI
SPORTS EDITOR

The Monmouth University Lacrosse team, the preseason favorite in the NEC, is coming off a season-ending loss in the NEC Tournament final. The Hawks are ready to return to championship form with a familiar cast. For the Hawks, this season is a continuation of the strong play they have had in recent years. The Hawks have made it to the NCAA tournament in four of the last five seasons.

Monmouth University assistant athletics director for communications, Thomas Dick, announced his resignation from the school. Dick had been with the Hawks for six years and has been instrumental in developing the school’s communications program.

Monmouth University has been successful on the field this season, winning five of its first six games. The Hawks have been led by a cast of experienced players, including senior attacker Ashley Waldman, who has scored 15 goals and added four assists. Sophomore midfielder Jeannine Stott has also been a key contributor, scoring 17 goals and adding 15 assists.

The Hawks will face a tough test in their next game, as they travel to New York to take on the Columbia Lions. The Lions are a tough opponent, having won six of their first seven games. However, Monmouth is ready to take on the challenge and continue their winning ways.

Monmouth University is located in West Long Branch, New Jersey, and is a member of the NCAA Division I. The Hawks compete in the Northeast Conference and are one of the top programs in the country. The team has produced multiple All-Americans and has been a consistent contender in the conference.

Monmouth University is a great place to be a student-athlete, with top-notch facilities and a supportive coaching staff. The team is well-versed in the game of lacrosse and is prepared to take on any challenge that comes their way. With the Hawks’ strong start to the season, they are looking forward to a successful campaign in the rest of the season.
Hawks get a jump start on the season.

The men’s and women’s track teams, led by Ashley Huffman, Martin Suarez and Katina Alexander, begin their 2006 outdoor seasons at the Monmouth University Season Opener. Story on page 26.
